Mistral box spring bed

best possible sleeping comfort for your guests

Due to an integrated barrel-form pocket spring unit, the mistral box spring bed offers maximum flexibility and the sleeping comfort of the luxury class. The overlying 3D-mesh fabric provides for optimal ventilation and pointwise elasticity.

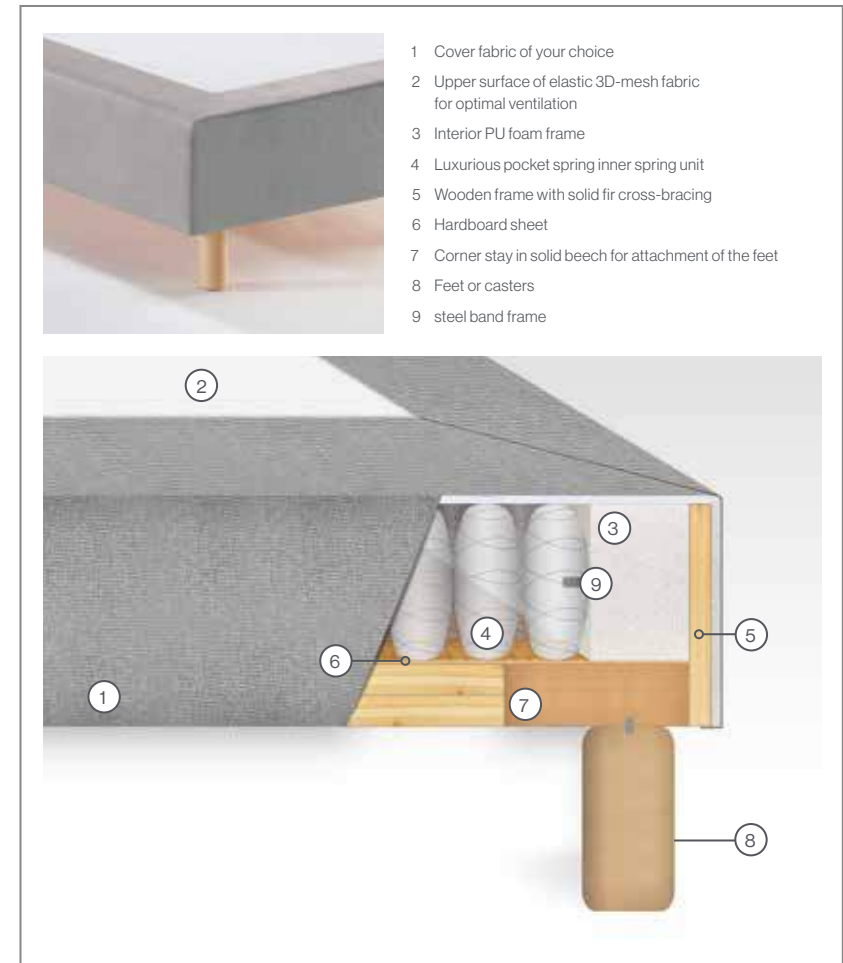

In combination with a barrel-form pocket spring mattress and a suitable mattress topper, this bed system offers the best possible conditions for restful sleep.

Mistral box spring bed

- » **quality:** maximum flexibility due to the integrated barrel-form pocket spring unit and the overlying 3D-mesh fabric for optimal ventilation; robust, solid wooden frame
- » **bed height without feet:** approx. 19 cm
- » **available fabrics and colours:** see pages 162 – 167
- » **available sizes:** 80 x 200 cm – 180 x 210 cm (custom sizes available on request)

Mistral accessories

- » **headboard:** our Mistral box spring bed can be combined with all available headboards (see pages 63 – 69)
- » **sets of feet:** up to 110 cm in width, two feet and two casters, and for widths of 120 cm or more, three feet and two casters (see pages 20 – 21)
- » **mattresses:** suitable barrel-form pocket spring mattresses complete our offering for perfect sleeping comfort (see page 36 – 42)
- » **mattress topper:** toppers, protectors and hygiene-covers offer additional sleeping comfort and enhanced hygiene (see pages 50 – 53)

Plaza hotel bed

the attractive entry-level variant popular with hoteliers

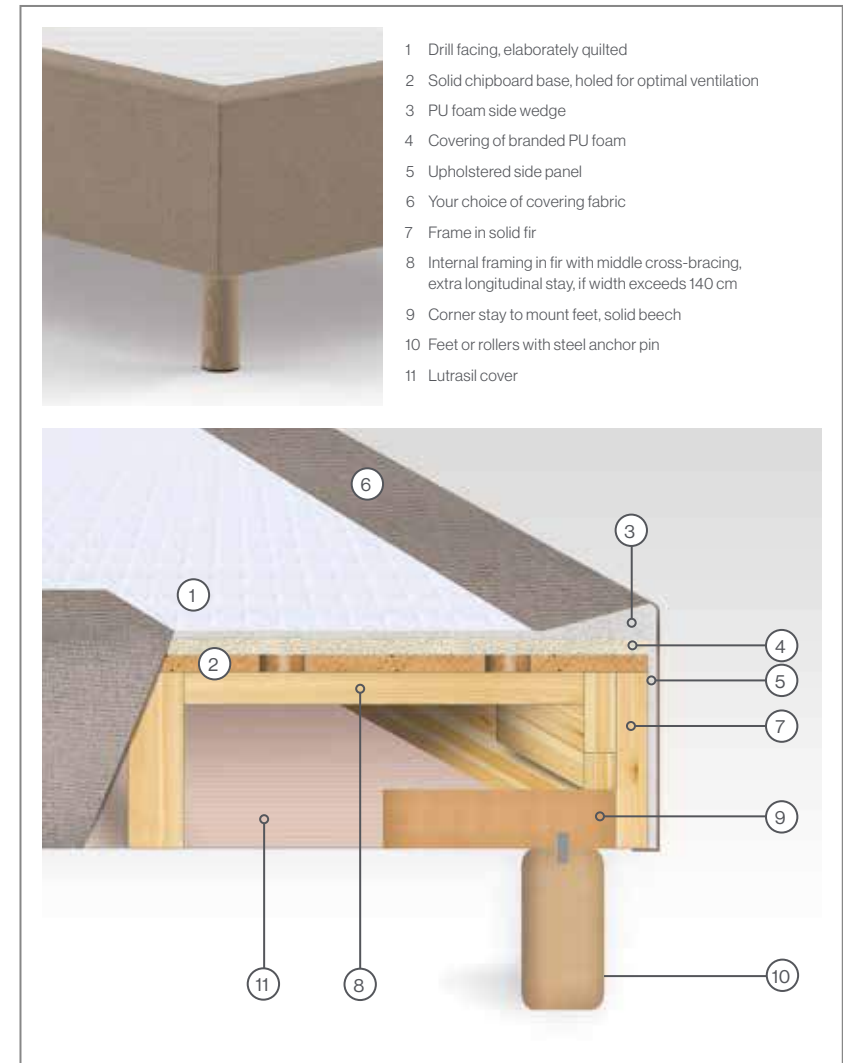

Plaza hotel bed

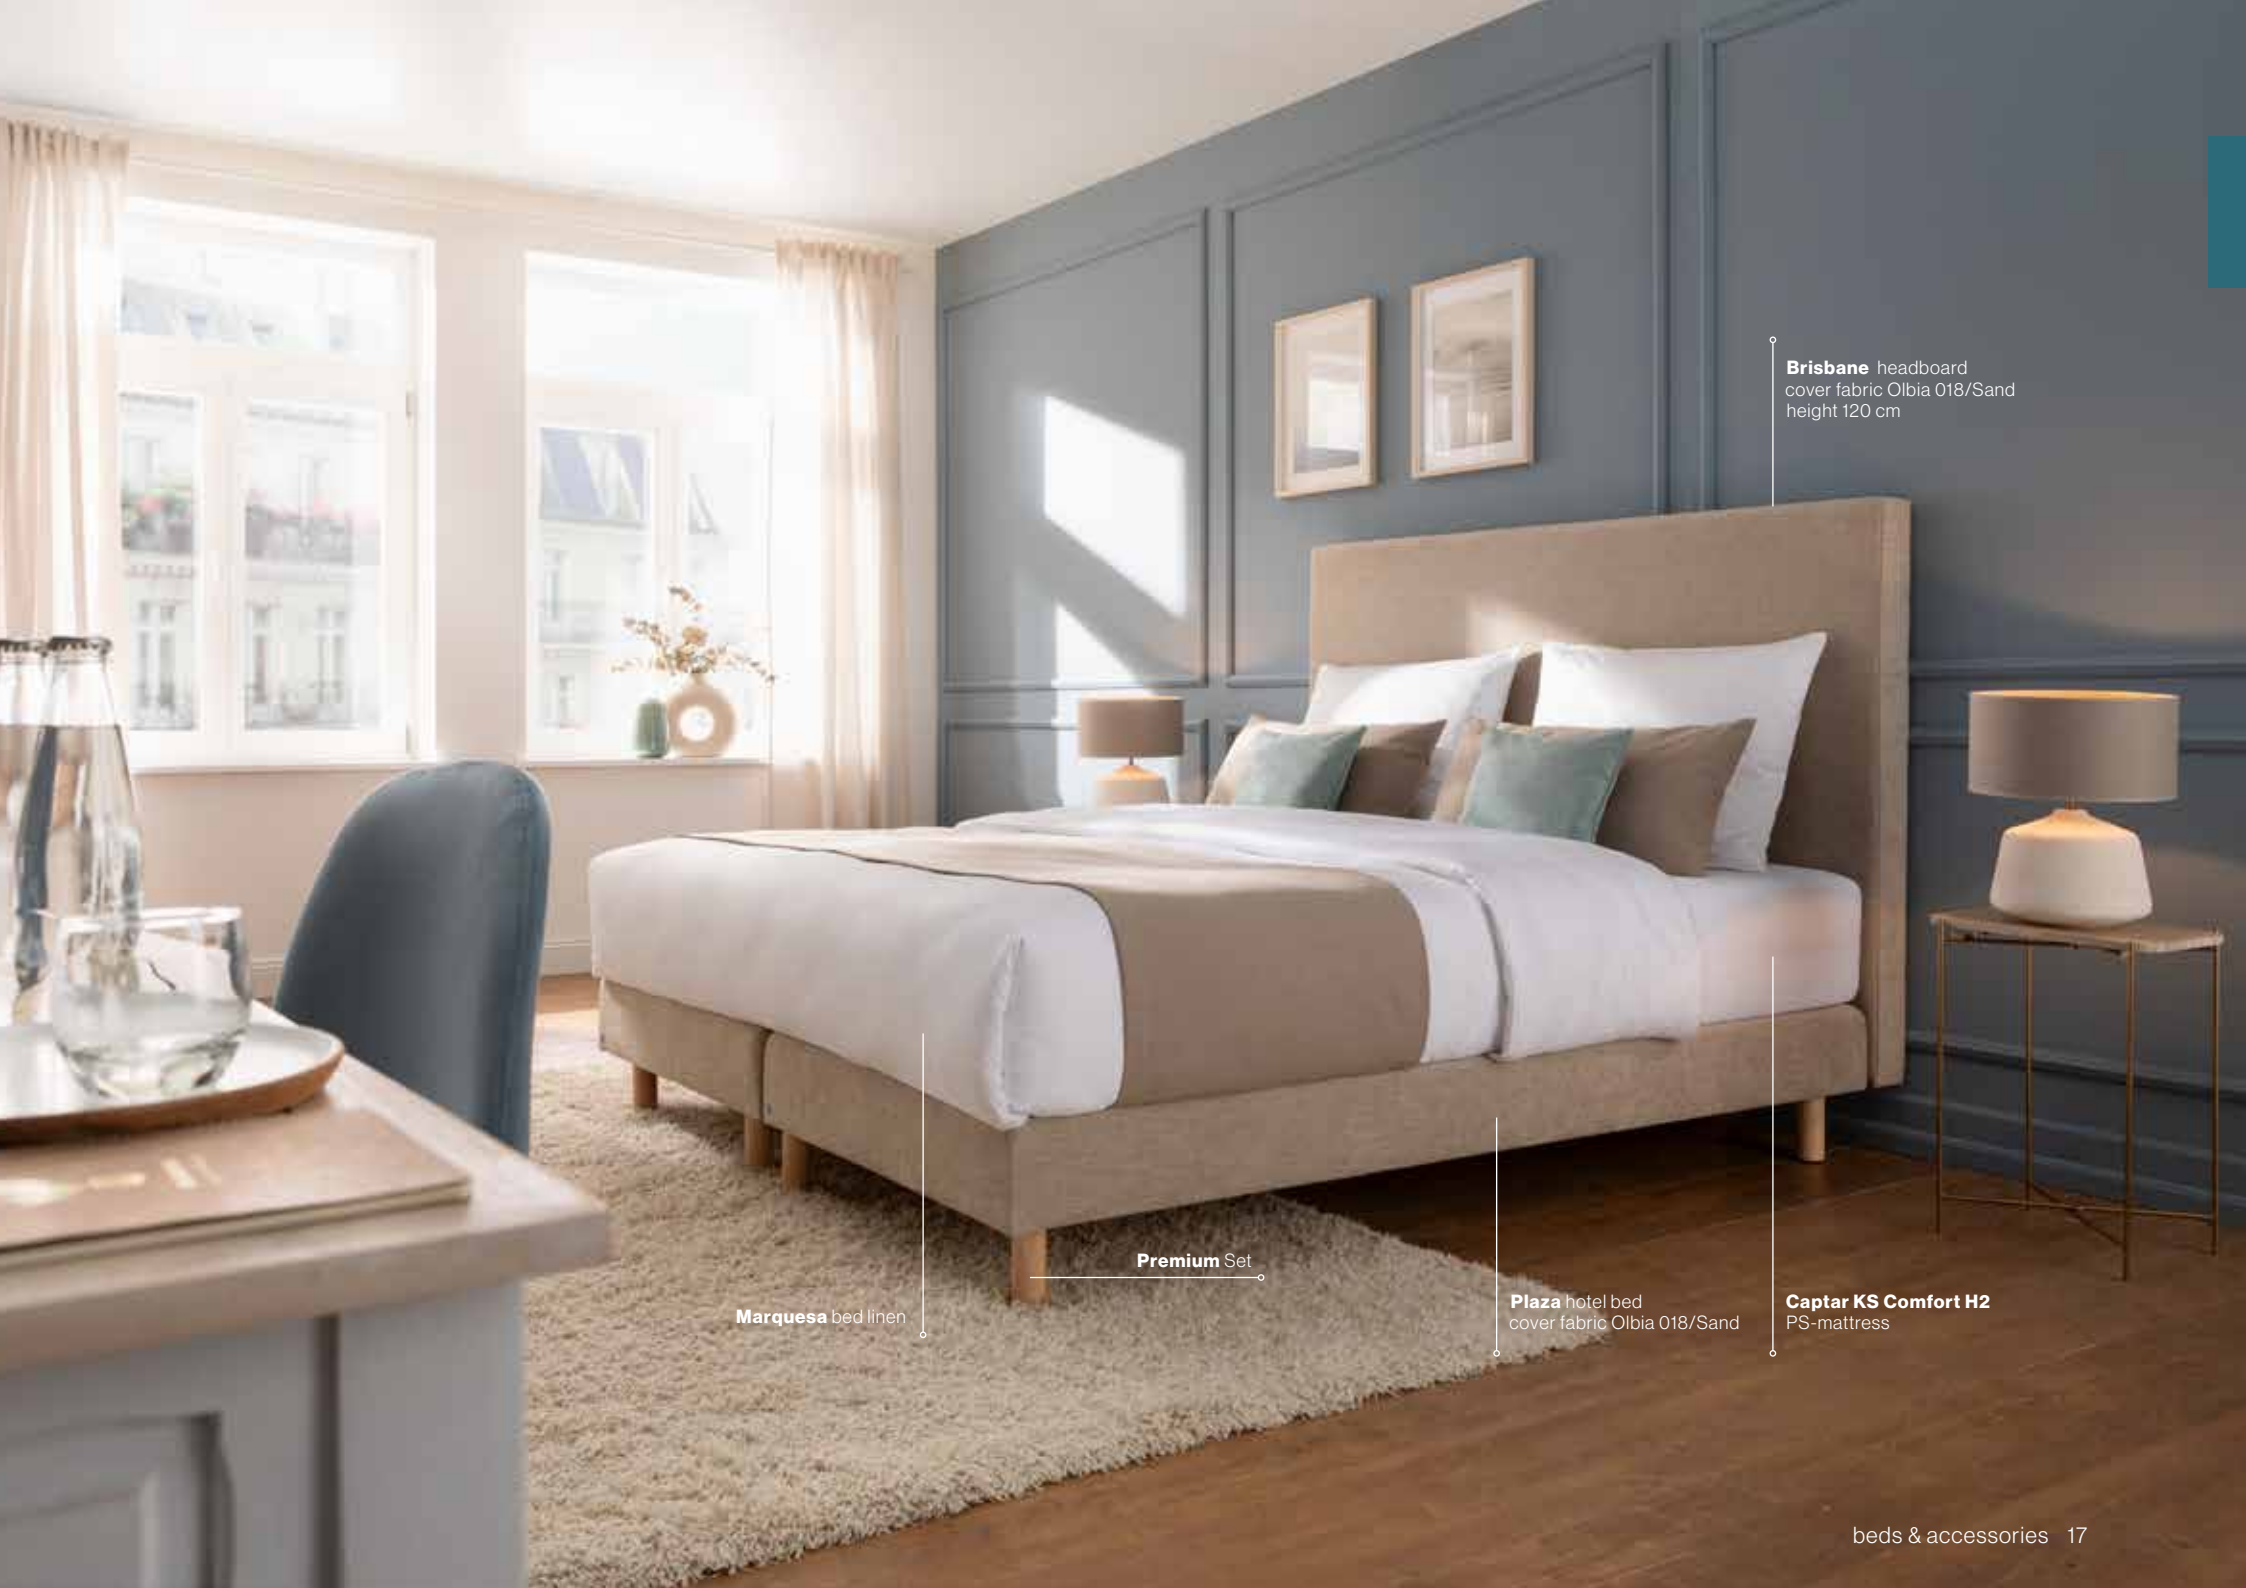

An elegant, robust hotel bed for all everyday requirements.

- » **quality:** high load-bearing capacity due to frame and cross-bracing of solid fir. Elaborate design with quilted ticking, circumferential side wedges and padded side covering
- » **bed height without feet:** approx. 16 cm
- » **available fabrics and colours:** see pages 162 – 167
- » **available sizes:** 80 x 190 cm – 160 x 210 cm (custom sizes available on request)

Plaza accessories

- » **headboard:** our Plaza hotel bed can be combined with all available headboards (see pages 63 – 69)
- » **sets of feet:** two feet and two casters or for widths exceeding 150 cm, two casters and three feet (see pages 20 – 21)
- » **mattresses:** inner spring and barrel-form pocket spring mattresses complete our offering for perfect sleeping comfort (see pages 36 – 42)
- » **mattress topper:** toppers, protectors and hygiene-covers offer additional sleeping comfort and enhanced hygiene (see pages 50 – 53)

- 56 care plus

A hotel mattress ...

must, first and foremost, suit your hotel and your guests. Despite differing body shapes and sizes, it should offer them optimal support and adaptation to individual body zones during sleep and so contribute to rest and relaxation. We achieve this through the use of best-quality materials.

Every year we manufacture over 200 different models in almost every size to meet specific customer requirements. We would be happy to help you to find the right concept for the well-being of your sleeping guests. Because, of course, contented guests come back again and recommend your hotel to others.

Many aspects speak for the outstanding quality of the mattresses from FBF bed&more:

- » Optimally adapted to the demands of the hotel-industry
- » Carefully selected materials guarantee robustness and long service life, so that we are able to offer a five-year warranty against breakage for the inner spring unit (Exception: model Primära)
- » Very considerable flexibility in production due to having our own manufacturing facilities

Characteristics of our mattresses

Air (breathable)

Under our branding "Air", you will find a range of especially breathable products. The coordinated use of particularly functional materials provides for a perfect sleeping microclimate through active temperature compensation and optimal air circulation.

Steel strip framing

The steel strip frame is a circumferential reinforcement for the inner spring unit. We install this either at the half-height of the inner spring unit or along its top and bottom edges.

The steel strip stabilizes the inner spring unit in the zones of the mattress which are subject to particularly heavy loading. It also provides additional stiffness at the edges for sitting purposes and, as a result, increases the service life of the mattress.

Flame-retardant (FR)

Of course, we also produce selected models according to the international standards for safety against fire. In accordance with the specifications of BS 7177:2008, we offer a wide selection of box spring beds, mattresses and toppers in the categories Low Hazard and Medium Hazard, which conform to all requirements in respect of fire safety.

Additionally, our product range includes models which are tested and certified according to the highest Italian fire-safety norm 1.IM (UNO I EMME).

Cold foam toppers

Cold foam excels through its high point-wise elasticity, its open-pored structure and the excellent sleeping comfort it offers. Thus, we achieve heavenly comfort for your guests through ideal pressure distribution and perfect back support with optimal body adaptation.

King-size height (Premium height)

When the mattress height exceeds 22 cm, our mattresses are labelled "king-size height". Assuming a corresponding base, this makes getting in and out of bed comfortably easy and leaves your guests with a feeling of luxury. A higher mattress also tends to offer the guest even better pressure relief and body adaptation.

Washable mattress cover

For many of our mattresses we offer detachable, washable covers. By way of a full circumferential zipper, these covers can be separated into two pieces, which can also be washed in normal washing machines. To provide even more protection for your mattresses in everyday hotel-use, we recommend hygiene-covers from our product range.

7-zones

Our seven-zoned mattresses offer additional comfort and an ergonomically superior sleeping position. The first three zones are for head, shoulders and torso. The middle zone supports pelvis and hips. The last three are for the thighs, lower legs and feet.

Mattress overview

Barrel-form pocket spring mattresses

The barrel-form pocket spring mattress (PS-mattresses) is considered to be the ultimate inner spring mattress.

It consists of many hundreds of springs, each packed individually into pockets.

Due to the high pointwise elasticity and the use of different zones, optimal support and adaptation to body shape is achieved for the sleeping guest.

A PS-mattress is only conditionally suitable for use on adjustable bases/slatted frames.

Advantages

- High point-wise elasticity
- Optimal body support
- Zoned variants available for improved body adaptation
- Partially available with washable covers – a plus for allergy sufferers
- Very good microclimate regulation for optimal sleeping conditions
- Long service life and shape retention

Bonell inner spring mattresses

Bonell inner spring mattresses are characterized by their low weight, their distributed elasticity and their long service life in hotel use and on this account are often used in the hotel industry.

A Bonell inner spring mattress is only conditionally suitable for use on adjustable bases/slatted frames

Advantages

- Lightweight and simple handling
- Good air circulation and moisture transport provide an optimal sleeping microclimate
- Well-suited for use on simple slatted frames without adjustment
- Long service life and shape retention
- An economical alternative to pocket spring mattresses

Cold foam mattresses / foam mattresses

Our foam mattresses are made from high-quality cold foam. This foam is characterized above all by its open-pored structure and its pointwise elasticity.

Our cold foam mattresses are ideally suitable for slatted frames and well-ventilated bases. For our hotel beds and box spring beds, we recommend our Bonell or BS-mattresses.

Advantages

- High pointwise elasticity
- Zoned variants available for improved body adaptation
- Anti-allergenic through washable covers
- Very well-suited to adjustable bases/slatted frames
- Balanced relationship between service life and form retention

Mattress toppers

Our mattress toppers offer you and your guests considerable added value. They increase comfort when lying, improve hygiene and visually highlight the bed in your hotel room.

Characteristic of mattress toppers and protective coverings

Air (breathable)

Under our branding "Air", you will find a range of especially breathable products. The coordinated use of particularly functional materials provides for a perfect sleeping microclimate through active temperature compensation and optimal air circulation.

Flame-retardant (FR)

Of course, we also produce selected models according to the international standards for safety against fire. In accordance with the specifications of BS 7177:2008, we offer a wide selection of box spring beds, mattresses and toppers in the categories Low Hazard and Medium Hazard, which conform with all requirements in respect of fire safety.

Additionally, our product range includes models which are tested and certified according to the highest Italian fire-safety norm 1.IM (UNO I EMME).

Impermeable to fluids

Our protective covers and overlays for mattresses are equipped with a polyurethane coating which is impervious to liquids but nevertheless breathable.

Washable toppers and topper covers

Some of our toppers are completely washable or have detachable, washable covers. By way of a full circumferential zipper, these covers can be separated into two pieces, which can also be washed in normal washing machines. To provide even more protection for your toppers in everyday hotel-use, we recommend hygiene-covers from our product range.

Topper overview

Topper

Our mattress toppers offer you and your guests considerable added value. They increase comfort when lying, improve hygiene and visually highlight the bed in your hotel room.

Advantages

- Protection for the mattress
- Covers washable
- Can improve comfort when lying
- Can modify the firmness of the mattress
- Single, continuous bed surface when spread over two mattresses

Cold foam topper

Cold foam excels through its high pointwise elasticity, its open-pored structure and the excellent sleeping comfort it offers. Thus, we achieve heavenly comfort for your guests through ideal pressure distribution and perfect back support with optimal body adaptation.

Advantages

- Very high pointwise elasticity and body support
- Hygienic sleeping conditions through good air circulation and washable covers
- Long service life
- Very good thermal insulation
- Lightweight, simple handling and easy transport

Visco foam topper

A thermo-elastic, pressure-relieving foam which adapts exactly to body contour.

Advantages

- High pointwise elasticity and so optimal adaptation to body form
- Optimal pressure relief for spine and vertebral discs
- Very high thermal insulation
- Lightweight, simple handling and easy transport

Comfort foam topper

Comfort foam is very flexible and offers, when suitably supported, optimal pointwise elasticity and body support.

Advantages

- High pointwise elasticity and body support
- Hygienic sleeping conditions through good air circulation and washable covers
- Good thermal insulation
- Lightweight, simple handling and easy transport

Toppers and overlays:

a clear plus in comfort for your guests

Tip

Our molleton fitted sheet Safe Care is worth **10 Points** towards your hotel classification according to the **DEHOGA criteria checklist**.

Parkhotel Landau, Landau

Care Plus is:

- waterproof
- breathable
- very easy-to-clean
- permanently flame resistant
- impervious to mites, viruses & allergens

With every hygienic cover you receive free a “Feeling good”-brochure with information for your guests.

Hygiene covers

optimal protection and ventilation guaranteed

Care Plus anti-allergenic hygienic mattress cover

Meeting the most demanding requirements for bed hygiene by shielding reliably against allergens. » **features:** the lightweight material is pleasant to the touch and has a breathable polyurethane membrane impervious to mites thus ensuring unimpaired sleeping comfort; the coating is waterproof but permeable to water vapour thus ensuring that moisture generated by body warmth during sleep is released to the atmosphere – the mattress remains dry; Care Plus eliminates the need for time-consuming, expensive cleaning of your mattresses and further provides additional protection through its flame retardant properties (Crib 5) » **quality:** trouble-free handling and good fit due to the integrated circumferential elastic tape; available in three heights; polyester fabric in an improved quality with polyurethane coating on the upper side; PVC-free; Öko-Tex-Standard 100 » **colour:** White (washable up to 95°C, suitable for tumble dryers up to 60°C) » **available sizes:** 80 x 190 cm – 200 x 220 cm

headboards & accessories

- 63 headboards
- 70 valances & bed plaids
- 72 decorative cushions

Headboards

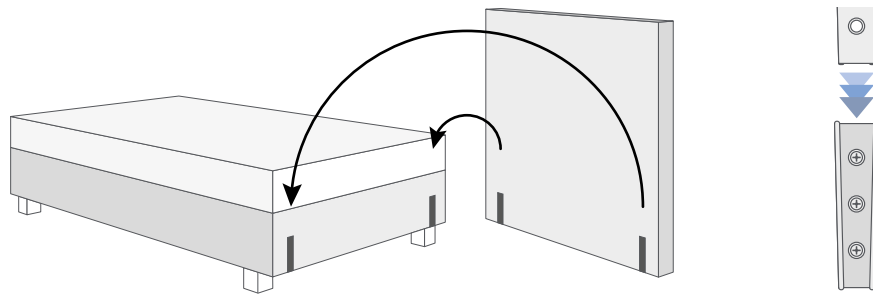

Headboards create a first-class atmosphere in your hotel. To this end, we offer a total of five different models. Mounting is simple and is made by way of a plug-in mounting rail on the bed; some models are delivered prepared for (do-it-yourself) wall-mounting. Other models and custom heights are available on request. High-quality bed plaids (see page 70) are a further optical enhancement.

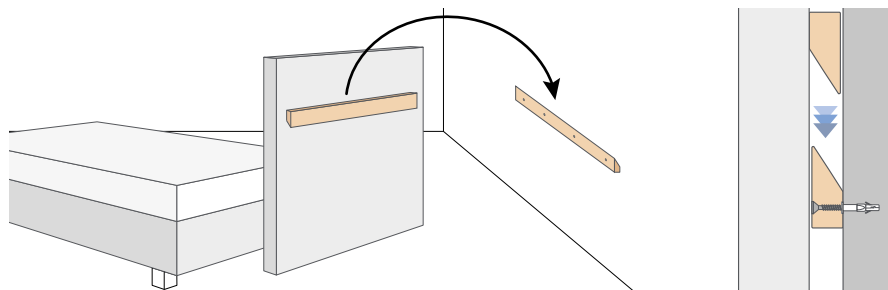

Mounting

Our Brisbane, Sydney and Venezia headboards are bed-mounted by way of plug-in mounting rails. Our Melbourne wa and Canberra wa headboards are delivered equipped for (do-it-yourself) wall-mounting.

Bed-mounting

Wall-mounting

More than just a sofa

functional, comfortable, modern

Riva sofa bed

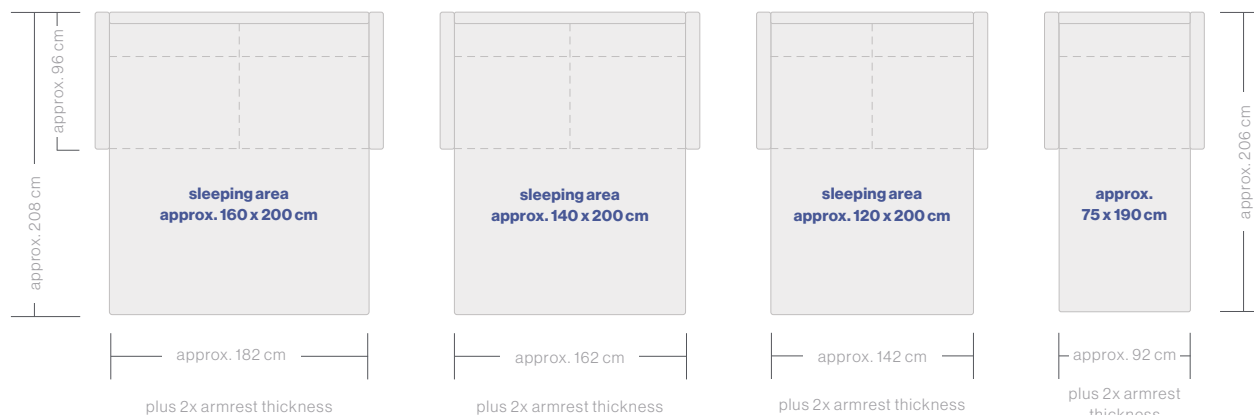

We offer sofa beds developed specifically for the hotel trade in our renowned FBF-quality. With our extensive range of cover materials, like for our beds you have many possible colour combinations. In the event of soiling or damage, the Velcro fasteners allow the cover to be removed for cleaning/repair. Thus, the sofas will blend exceptionally well into your room décor. Well-engineered and equipped with the so-called „Rapid-System“, they can be unfolded and folded away in a few seconds with little effort. A high-quality, 14 cm thick cold foam mattress and a solid, durable supporting base provide good sleeping comfort for your guests. » **sleeping areas:** approx. 075 x 190 cm, approx. 120 x 200 cm, approx. 140 x 200 cm, approx. 160 x 200 cm » **armrest thickness:** A: approx. 16 cm, B: approx. 10 cm, C: approx. 4 cm, D: approx. 3,5 cm » **height of backrest:** approx. 82 cm » **seating height:** approx. 44 cm

Available fabrics: Alba, Dallas, Dillon, Manhattan, Tunis, Olbia, Padova Plus, Paris, Seattle, Tirol, Nashville, Wallace (see pages 162-167); Prices: see page 79

Please note that the overall width of the sofa depends upon the armrest selected

Info

Top-Highlight for your Housekeeping: For a modest surcharge, we can equip your Riva sofa bed or chair bed with an integrated, easy-to-operate lifting system, which allows the sofa/chair to be rolled away easily in two steps..

Select a suitable armrest.

Meran sofa-bunk bed
cover fabric Olbia 026/Blue

More than just a sofa

space-saving, functional, comfortable

Meran sofa-bunk bed

Our offering now includes sofa-bunk bed Meran, newly developed in renowned FBF-quality specifically for the hotel equipment market. A robust and at the same time stylish sofa with which you can create quickly, as needed, two fully fledged beds in limited space. Our large selection of cover fabrics offers you a wide range of possible combinations. By means of a unique transformation system, the sofa can be converted into a comfortable double bunk in a couple of minutes. The top bunk can be raised and locked into position effortlessly using the lifting system and then the lower bunk can be simply pulled out. The ladder and the security railing built into the frame fold down between the beds when the unit is being used as a couch. The two high-quality 14cm thick cold foam mattresses on a solid, durable base offer your guests good sleeping comfort. » **maximum load on the upper bed:** 90 kg » **reclining surface(s):** approx. 80 x 190 cm » **seating height:** approx. 48 cm

- 102 synthetic duvets
- 106 down and feather pillows
- 110 down duvets
- 112 pillow selection

Bedding

A duvet must provide warmth, absorb moisture and release it again and offer your guests pleasant conditions for sleeping. We offer your guests two different fillings: synthetic fibre and feather/down.

Features of our bedding

Fillings

For our duvets and pillows, we offer fillings with different characteristics. Please feel free to call us – we will be glad to advise you.

Custom sizes

We offer you the possibility to have products manufactured according to your individual requirements. Please address us regarding your size requirements; we will find a suitable solution for you.

Replenishment

As may be required from time to time, the filling in some of our pillow variants can be augmented or removed. The filling may also be completely replaced. We have suitable replenishment packs in stock.

Washability of feathers & downs

Our feather and down products are all washable at 60°C – for still better hygiene in your hotel beds. Proper care is of the utmost here: Please use a mild detergent for your bedding and do not use a fabric softener as this can cause the feathers to clump. It is best to use a gentle washing cycle for your feather/down bedding. Please always carefully follow the washing instructions on the care label.

Washability Synthetics

Synthetic fibres are generally acknowledged to be easy-care and, in particular, to be easy to wash. Proper care is of the utmost here: Please use a mild detergent for your bedding and do not use a fabric softener as this can damage the fibres. Please always carefully follow the washing instructions on the care label.

Thermal insulation rating

Summer duvet	Thermal insulation rating 1	A lightweight duvet for warm to very warm room temperatures.
Spring/autumn duvet	Thermal insulation rating 2	A lighter duvet for warmer room temperatures.
Winter duvet	Thermal insulation rating 4	Very warm for cold rooms.
All-seasons duvet	G	Intermediate thermal insulation rating for an average room temperature.

Bedding overview

Synthetic bedding

In our synthetic product lines, very different fillings with their corresponding advantages are available to you. Our synthetic duvets are all washable, very easy-care and are thus particularly suitable for allergy sufferers.

Advantages

- Easy-care
- Economical
- Durable
- Special “anti-allergy article”, washable up to 95°C

Feather/down bedding

Having regard to bulking capacity and thermal insulation, feathers and down fillings are a very good choice. We offer fillings of both duck and goose feathers and down, all of which are certified as Class I according to DIN-EN 12934, which is to say, guaranteed new product.

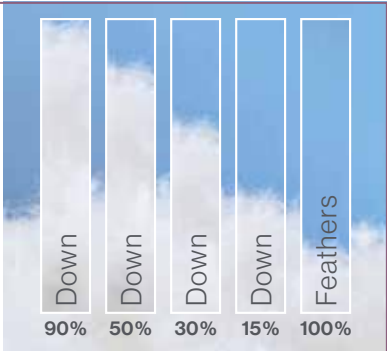

Advantages

- High thermal insulation
- Natural material
- Very breathable
- Durable
- Washable up to 60°C

Feather & down pillows		Washability	Filling	Weight of filling in g for size 60x80 cm	Price in € for size 60x80 cm	Page
	Sibiria	60°C	70 % feathers and 30 % down, half-white, new Siberian goose feathers and down.	800	39.30	106
	Tri Star Premium Bestseller	60°C	Inner: 100 % feathers, half-white, new duck feathers; Outer: 90 % down and 10 % feathers, white, new duck feathers and down.	640/160	36.70	106
	Luxury	60°C	70 % feathers and 30 % down, white, new duck feathers and down.	800	31.60	106
	Star	60°C	85 % feathers and 15 % down, half-white, new goose feathers and down.	800	24.10	107
	Dream Bestseller	60°C	85 % feathers and 15 % down, half-white, new duck feathers and down.	800	20.60	107
	Best	60°C	100 % half-white, new goose feathers	800	13.30	107

Info

Bedding of high-quality down and feathers have excellent elasticity, also known as filling capacity; with proper care the filling capacity will be retained for many years; with increasing down fraction of the filling the volume of the duvet increases – the weight of the filling remains the same.

Superior down duvets

Washable up to 60°C – for even more hygiene. » **Features:** every down duvet is oversized to precompensate for shrinkage during washing and finished with a piping of bias binding; the individual panels are quilted to prevent slippage of the filling » **Service:** we will also be pleased to manufacture special sizes for you on request » **Cover:** fine thread casing of 100% mako cotton » **Filling:** original filling, that is to say, guaranteed new, class 1 product conforming to DIN-EN 12934 » **Colour:** White

bed linen

- 122 mako satin lightweight bed linen
- 124 damask bed linen
- 126 satin bed linen
- 128 damask and seersucker bed linen
- 130 interlock jersey bed linen
- 131 sheets
- 135 articles for children
- 138 blankets and fleecy rugs

Bed linen

Easy-care, high-quality, versatile and customisable – the FBF bed linen programme is designed entirely to meet the wishes of the hotel industry. Let our high quality, our extensive range of fabrics and our innovative design suggestions convince you.

Characteristics of bed linen

Mako cotton

Traditionally, the finest cotton comes from Egypt. The cotton fibres are particularly long-staple so that especially fine but at the same time very robust thread can be spun. Our mako bed linen is particularly smooth and pleasantly soft to the touch. When the bed linen is washed frequently, its low weight and volume help to save money on these consequential costs.

Damask or satin

Both fabrics are made from high-quality yarns. The difference lies in the style of weaving. Satin fabrics use the Atlas weaving style and as a result have a particularly dense and smooth surface ranging from matt to high gloss. In the case of damask, we often find elegant floral patterns but also simple, elegant patterning.

Jersey

Jersey is a knitted fabric and is, as a result, particularly soft, elastic and supple. Our Estella bed linen range is breathable, non-iron and thus very easy to care for.

Blended fabric

Fabric blends are made from a mix of different materials and can therefore combine the advantages of the constituent yarns. By combining cotton and polyester, we obtain bed linen which is particularly soft and comfortable due to the cotton component and, on the other hand, dries faster and is less prone to crinkling due to the polyester component.

Flap closure

We deliver the majority of our bed linen tailored with flap closure. It therefore requires neither buttons nor zip fasteners. Bed linen with flap closure can be inserted into the cover more quickly and handling for washing and ironing is significantly easier.

Bed linen overview

Mako satin lightweight bed linen

Advantages

- optimal cost-effectiveness
- reduced weight and volume minimize costs for frequent washing
- extremely hard-wearing and durable
- exceptionally pleasant on the skin
- excellent washing and ironing characteristics
- it can safely be washed at 95°C (Use a corresponding washing powder for coloured fabrics)

Care tips:

- New linen should always be washed at low temperature before first use. This allows the fabric to retain its softness better.
- As a basic principle, white and coloured linen should be washed separately.
- Damp items should not be placed on top of one another.
- You should adhere strictly to the advice on the care label. The recommended temperature is particularly important.
- The amount of detergent and the size of the wash load have a significant influence on the appearance and service life of your linen. Please follow the corresponding manufacturer's recommendations carefully.
- Dried stains can often only be removed using aggressive chemicals. We therefore recommend that heavily soiled linen be soaked immediately. Often then just a normal washing cycle will suffice.
- Correct pressing gives your linen the proper finish. In addition to an appropriate residual moisture content, the direction of pressing is important in order to maintain the correct shape of the articles. Pressing should be primarily in the longitudinal direction but at regular intervals also in the lateral direction.

Terry products

FBF's terry product lines allow you to transform your bathrooms and wellness areas into small oases of relaxed well-being. Discover exclusive hand towels, bath towels and sauna towels in twisted and single yarn terry as well as bathrobes for the perfect spa experience.

Features of our terry product lines

Embroidery

We offer a variety of possibilities for you to present your hotel or enterprise in the best possible light: We can apply embroidery to your terry towelling products quickly and for small batches. All we require from you is the text, the font and the exact size and colour specifications.

Monograms

Individual monograms enhance the image of your establishment. The many alternatives in the area of towelling are particularly attractive. An individual interweave motif is possible, starting at 150 pieces per size and colour. Choose between a classical name or a more elaborate logo and we will implement it for you within the limits of technical possibility – for a fixed price without additional charges.

Modal

Modal is elastic and keeps its shape well. This means that the fibres remain soft and supple, even after many washing cycles. Modal combines well with cotton and enhances the water absorbency of the terry towels.

Safety hem

All of our towelling products are equipped with a safety seam along the long sides, which are most subject to wear-and-tear, for best possible resistance to fraying, even after many washing cycles.

Single yarn terry

Single yarn terry delights the user with its first-class feel, leaving the skin with a pleasant, pampered feeling. By way of a special washing and boiling treatment after weaving, single yarn terry offers high density and is particularly absorbent.

Twisted yarn terry

Twisted yarn terry is among the most absorbent and durable terry products. An additional twisting of the yarn during the weaving process results in a firmer and exceptionally durable terry cloth with high absorbency and a pleasant feel. This material is therefore ideal for the demanding requirements in the professional hotel and hospitality sector.

An overview of terry products

Info

Proper care of terry products:

For reasons related to production, terry cloth exhibits shrinkage rates of up to 15%, for which reason we recommend:

- new product should always be washed and dried with a gentle programme at low temperatures before use
- concerning the daily washing of terry towelling, never overload the washing machine – this causes premature wear at the edges and pulled threads in the pile
- in the dryer, overloading results in the fibres not being able to expand freely, leading to a hard, stiff feel of the cloth.

Your competent partner: for service as well

Certified quality and competent consultancy

We attach great importance to offering, at an attractive price, certified quality coordinated with the requirements of the hospitality industry. For many of our products we offer long-term warranty. Our highly qualified team will be glad to be of assistance to you – by telephone or on your premises, all over Europe.

Services

In addition to our products, we offer a wide range of ancillary services and options such as leasing and hire purchase, profitability calculations, warehousing, handling and installation of beds and mattresses, disposal of used beds as well as a high degree of flexibility and reliability in transport and during delivery.

Monograms and embroidery

Personalised embroidery and monograms on bed linen, towels and bathrobes enhance the image of your establishment. We would be happy to advise you on the possibilities for this form of advertising.

Free material samples

You would like to convince yourself directly of the quality and colour of a particular product? Let us send you our sample collection free of charge so that the article really does meet your expectations later on.

Customisation to your requirements

With our flexible production facilities, we can customise many of our products to meet your specific personal requirements – from small batches for custom sizes through to the processing of your own cover fabrics. For larger batches we can extend our extensive standard offering to include solutions developed specifically to meet your requirements for bed and textile systems.

our general terms of business

All orders shall be executed on the basis of the following general terms and conditions of business, which shall be acknowledged at order placement. These shall take precedence over any conflicting general terms and conditions of business.

All prices are net prices and subject to additional, statutory value-added tax at the rate prevailing on the date of invoicing.

Our terms of payment are 'payment in advance, less 2% discount'. Other conditions are to be agreed upon.

Our prices are EXW Neustadt/Aisch; additional freight costs will be forwarded on demand. Our terms of delivery are as advised (ICC Incoterms 2010).

Sales only to commercial consumers. The applied warranty period is 1 year and starts with the date of delivery of the goods. We reserve all rights of supplementary performance.

We shall retain the proprietary rights to all goods supplied by us until the customer has met all the charges arising from the business relationship.

Our tenders are made without obligation and are subject to price changes, prior sales, errors and misprint.

Place of performance shall be the head office of the seller; place of jurisdiction for all disputes shall be the head office of the seller.

Handling, installation, disposal

no mountain is too high for us to climb

» more than just a delivery service

Our comprehensive service offering, from warehousing to handling and installation through to disposal of used beds and mattresses leaves nothing to be desired. Whether by van, ship or even helicopter, we reach every destination. Our order-driven production, based on well-trained personnel and the most modern equipment, guarantees the highest quality standards and the shortest possible delivery times, even in the case of custom products. Many of our standard articles are available off-the-shelf at short notice.
